WORK EXPERIENCE

LCTB Branding Agency

2020-Present Creative / Web & Graphic Designer

Let's Cut The Bull is a fresh design firm created to share areas of expertise and projects between experienced young professionals seasoned in copywriting, logo and stationery design, marketing strategies, web design & development and digital marketing. We've reached a constant flow of clients that comes from word-of-mouth publicity. We work mostly with SMEs or directly with professionals, such as Marat Rodriguez, talent manager working with big names in Mexico City like Danna Paola.

SR BANG BANG Advertising Agency

2018-2020 Web Designer / Creative

Worked on great projects for big brands that presented a lot of challenges that made me grow as a designer, but also as an individual having to deal with high pressure and freedom which translated into a lot of responsibility. During my time there I was in charge of the design and development of the Miss CDMX's web platform. I was also engaged in the coordination of the contestants to get material for the website like interviews, special dynamics, profiles etc. and in the creative team, pitching in on tactics to get people involved. Worked with the city and many sponsors on promotional events that I helped organize and create design elements for, like Red Bull, Moët & Chandon and others directly.

FILMS CON MADRE Publicity Agency

2016-2018 Graphic Designer / Project Manager

Got the opportunity to develop leadership skills through being in charge of teams of around five people including designers and copywriters as project manager for projects like the visual package we did for the MLS channel in FOX Sports Mexico, including a 3D Jumbotron animation and an extensive set of swipes to present matches, scores, ads etc. I worked directly with important brand executives and coordinated constantly with other agencies' teams. Films Con Madre dissolved in 2018, at which point one of the founders created a new agency called SR Bang Bang and took me with him.

HAWAI 2.0 Casting Agency

2015-2016 Graphic Designer

Did work for interesting clients as a rookie graphic designer, also diving and learning to apply and develop my design skills further into things like motion graphics. I was excited to work for big brands like TRUPER and learned to deal with clients directly and the important skills to refine materials constantly to fit specific needs and lineaments after client meetings, focusing on specific objectives and design with purpose.
